

## CREATE A TIMELINE

When introducing a new study of a book of the Bible or an event within a book of the Bible, consider creating a simple timeline. A timeline can...

- help learners put the passage under consideration in its proper historical context.
- help learners better understand the flow of events in the Biblical narrative.
- provide a visual aid that can help learners remember the historical context of events.

### CREATING A SIMPLE TIMELINE

You can create a simple timeline on the chalk board in your classroom or on a handout. For example, if you are studying the fall of the Southern Kingdom of Judah and the events that followed, create a simple timeline that can help learners visualize when things happened.

Build on your timeline over the course of your study.
